Table 3: The mean (and standard deviation) ratings of every argument and arguer position on a 7 point Likert scale (1 = Strongly Disagree, 4 = Neither Agree Nor Disagree, 7 = Strongly Agree) Asterisks mark the ITT ratings, bold figures are the Baseline ratings.

Note that this table provides an insight into polarisation - in that vegans disagree relatively strongly with all arguments against veganism, whether they are provided by vegans (2.13) or non-vegans (2.27), but agree relatively strongly with arguments for veganism whether they are provided by vegans (6.00) or non-vegans (5.81). In contrast, non-vegans' ratings of arguments for and against veganism all fall between 'neither agree nor disagree' or 'somewhat agree' regardless of arguer, or surprisingly argu*ment* position.
